

## Ways to listen to Infoshare and how to record your own message

### Listening to Infoshare

There are several ways you can listen to Infoshare:

- **On Amazon smart speakers:** tell your Alexa device to "**open Infoshare**". You can choose individual messages to hear or just let all the current messages play one after another.
- **On any phone:** dial 03000 111 555 and select option "**8**". You can use your phone's keypad to control which individual messages you want hear.
- **As a podcast:** subscribe to the free podcast, whose URL is <https://www.infosound.org.uk/podcast.xml>. This will play individual messages on a variety of podcast-playing devices, including some specialist audio players.
- Some audio and podcast-playing devices, run and administered by others, also carry Infoshare. These include:
  - the [British Wireless Bumblebee tablet](#).
  - both [British Wireless](#) Sonata audio players.
  - [Apple Podcasts](#) / iTunes.

### Recording your own message for Infoshare

To have your own message featured on Infoshare, just call us at any time on

**03000 111 555**

- **then press the 5 button on your phone** to record your message
- **then press the 6 button on your phone** to hear a few hints and tips about recording what you want to say before recording your message.

All messages are tidied-up and edited, where necessary, but we never change the essence of what you want to say. So mistakes don't matter at all – you do not have to call back – if something doesn't come out the way you want, just say it again and we'll make sure it all sounds fine before anyone else hears your message.
